- ❑ Digitization & Workflow Effectiveness
- ❑ Digital Sustainability

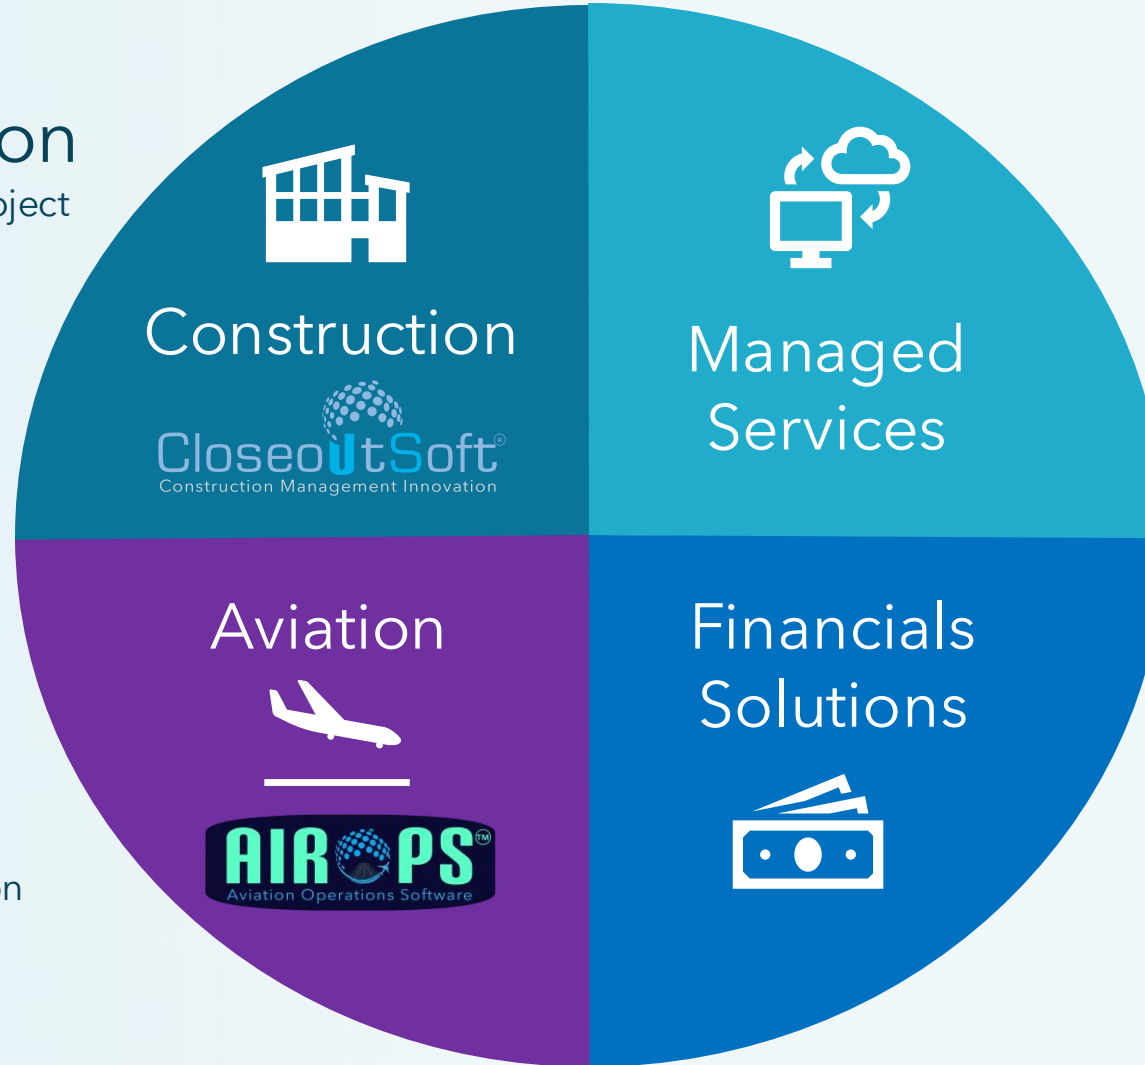

Digital Transformation

Process Automation

Process Map, Digital Workflow, Project Management Best Practices

Software Modernization

Data Collection, Data Enrichment, Workflow Configuration, Application Mapping, Agile Development,

Efficiency & Governance

Dashboards, Drill-Down Analysis, Approvals & Authorization, Status Alerts

Data Integration

Digitization, Document Versioning, Interfaces, Data Security, Secure Data Transfers

Features

100% Digital &
Paperless Submission

Real-Time Progress
Update & Monitoring

Estimation to Actual
Construction Tool

Built-in Occupancy
Taking Over Procedure

Effective Built-in
Progress Communication

Facility Management

Built in QA/QC Inspection
Process & Procedures

Planning & Reports

Auto Generated Punchlist
& Asset Register

Effective Built-in Document
Management System

Effectively managing Post
Construction Activities

Safety & Security
Measures

CloseoutSoft achieves project completion by prioritizing accountability and auditability with robust features for efficient project oversight utilizing:

1. Secure submittal and document management
2. Built-in QA/QC processes
3. Detailed handover monitoring
4. Integrated cost control
5. Comprehensive asset register
6. Built-in Document Management

The platform's modules seamlessly integrates engineering and construction activities, ensuring a smooth transition from Construction to the Operational phase. The centralized project information enhances communication among stakeholders, reduces administrative costs, and optimizes resource allocation.

The CloseoutSoft Edge

Your projects, our expertise - delivered with ease

Versatile & Scalable

CloseoutSoft adapts effortlessly to your project's size and complexity. Whether it's a site with 100 buildings, 10, or even just 1.

Location-Agnostic

Anywhere, Any global project, our system ensures seamless management, irrespective of geography.

Resource Optimization

Efficiently allocates and manages resources, ensuring smooth operations regardless of project demands.

One stop Solution - Engineered for Construction Success

From planning to closeout - No matter the size, location, or resources, CloseoutSoft is fully capable of managing your construction needs with precision and ease.
